Located on the northern shore of the Moonsea in the Forgotten Realms, the fabled city of Phlan had been overrun by monsters led by a mysterious leader. Your quest: discover the identity of this evil force and rid Phlan of its scourge.

POOL OF RADIANCE represents the first in a line of software created by SSI in collaboration with TSR — the producer of the legendary ADVANCED DUNGEONS & DRAGONS® fantasy role-playing system. It adheres faithfully to AD&D® game standards. Roll up your characters from four Classes, six Races and nine Alignments in classic AD&D game fashion; or use the party already provided. The computer graphics are strictly state-of-the-art. Cities, dungeons and encounters are shown in realistic 3-D perspective. Personalize your heroes' combat figures with individual weapons, armor and colors. Add NPCs (computer controlled Non-Player Characters) to your party of up to 6 PCs (Player Characters) to fill out

your 8-character party. Control your PCs during battle, or let the computer handle some or all of the action. To help your party on its many difficult missions, the Adventurer's Journal guides you with history, maps, clues and rumors. A Translation Wheel converts Elvish and Dwarvish writing to English.

Roll up your characters, in classic AD&D® game fashion, and see their portraits and characteristics.

Every monster type has its own individual drawing.

The legendary DRAGONLANCE™ game world comes alive in this exciting action game! HEROES OF THE LANCE marks the first computer action game that re-creates the epic battle between good and evil on the world of Krynn. (For those familiar with the AD&D® game system, HEROES OF THE LANCE is derived from the first DRAGONLANCE module, *Dragons of Despair*.) You control eight Companions, each with different specialized attributes and skills. Guide these brave adventurers deep into the treacherous ruins of the temple Xak Tsaroth to retrieve the precious Disks of Mishakal. As you descend into the Abyss, the Companions must defeat the hordes of monstrous Draconians in hand-to-hand combat, deal with powerful magic and survive the onslaught of attacks from giant spiders, skeletal undead and countless other terrors. But your final obstacle makes these monstrosities innocuous by comparison: The platinum disks you seek are guarded by

Khisanth, an ancient black dragon. And there is but one way to vanquish this mighty beast. Find the key to destroy Khisanth or you are doomed to failure.

Tanis, the half-elf, fires an arrow into the black dragon, Khisanth.

The Heroes, with Caramon in front, battle a Draconian in the catacombs of Xak Tsaroth.

A utility program designed to help Dungeon Masters generate encounters for AD&D® campaigns. SSI's DUNGEON MASTERS ASSISTANT, VOLUME I: ENCOUNTERS is a great time saver for Dungeon Masters (DMs). With thousands of separate encounters, monsters and characters provided, it can reduce game prep time by several hours per session. The database is prodigious indeed: Over 1000 encounters and over 1300 monsters and characters, including all monsters from the AD&D® Monster Manuals I & II. Monster records and encounter printouts total several hundred pages! (Note: a printer is not required in order to use this product since data can also be output to disk or screen.) Catering to the DMs' boundless creativity, this product easily allows DMs to modify the existing data or add their original monsters and encounters to the database.

By harnessing the power of the computer, this program makes it practical to use the vast numbers of monsters and encounters created for AD&D game play.

Data at your fingertips: Includes material from the famous AD&D® Monster Manuals, Dungeon Masters Guide, Players Handbook and Unearthed Arcana.

In STELLAR CRUSADE™ two fanatical groups embark on a mad race to control a small, but vital star cluster. It is an exciting strategy game of exploration, economic power and military conquest on an interstellar scale.

As the leader of one faction, your first task is to send out exploration teams to grab the best planets in the star cluster and colonize them.

Next, you must build up your economic strength to prepare for war. This entails allocating raw materials and production points to build shipyards and maintenance facilities; train and supply troops, engage in research and development; establish farms, mines, refineries and factories. Remember, wars are never won by the poor or poorly-prepared.

To win a star war, you need starships. In this game, you can design your own and arm them with a host of offensive and defensive weapons. Group your starfleet of scout ships, cruisers and battlecruisers into task forces, each led by a commander of your choice. Although these task force commanders come rated for skill levels and experience, you won't know how competent they are until after their first battle.

Play against a friend or the computer. There are seven different scenarios with multiple levels of difficulty: three short, three medium and one long campaign that spans decades! By Norman C. Koger, Jr.

BATTLES OF NAPOLEON™ allows you to simulate practically any Napoleonic engagement on a detailed, tactical level. How? By giving you all the tools to create any battle of that historic era. Battles of Napoleon is a superb advanced wargame — and a full-blown construction set.

Use the computer to generate random maps, then modify them as you choose. Or start from scratch by building your own maps, square-by-square (each representing 100 yards). Your terrain options include five levels of elevation, woods, roads, fields, swamps, water, towns and redoubts. Create your own armies or adjust the armies provided to suit your exact specifications: number of men, type of units, weapons and nationality. Rate your

units for melee strength, leadership and morale.

The construction-set features allow you to re-create any Napoleonic battle — real or imaginary. The game system gives you all the joys of miniatures play — realism, authenticity and detail — without the mathematical and accounting headaches. For those wishing to bypass the design phase and jump into action right away, simply choose from the many pre-made scenarios, such as Waterloo, Quatre Bras, Auerstaedt and Borodino.

If your idea of fun involves skirmishers, cavalry charges and infantry squares, look no further than Battles of Napoleon. By David Landrey and Chuck Kroegel.

B-24™ is a flight/combat emulator that challenges you to fly 19 dangerous bombing raids over the Axis' oil refineries at Ploesti, Rumania. You command the lead B-24 Liberator, which will determine the course of action for an entire formation of forty B-24s. First, practice taking off, flying in formation against flak and enemy fighters, bombing targets and landing. Once you're ready, it's time to bomb Ploesti and reduce its total oil production below what was accomplished historically. If you succeed, you'll be told how much you would have shortened the war in Europe! By John Gray. Includes graphics routines from The Graphics Magician® by Polarware™.

Note: APPLE disk is 64K.

The Battle of Gettysburg began, not with a bang, but with a whimper. It started on July 1, 1863 as a minor skirmish between a few Confederate and Federal brigades. By July 3, it had grown to monumental proportions, hurling 160,000 brothers against each other. GETTYSBURG: The Turning Point™ uses a refined version of the critically acclaimed system first seen in SSI's Battle of Antietam™ to recreate this decisive battle in consummate detail and accuracy. Some of the refinements are: A precise command control system that more accurately reflects the effects of leaders on the battlefield; ammunition points; more realistic fatigue rules; combat that is resolved down to each individual soldier, including every artillery man. Beginner, Intermediate and Advanced games are provided. By David Landrey and Chuck Kroegel.

WARSHIP™ is the definitive game of surface naval warfare in the Pacific from 1941-45. You can choose from 79 classes of ships from the Allied and Japanese fleet. Each ship comes historically rated for: number, size and turret armor of main and secondary guns; number and type of torpedo mounts; maximum speed; radar; flotation; belt armor; deck armor; and earliest year of availability. You set the course and speed, fire torpedoes, and choose "Ship" or "Division" command mode. During combat, the computer calculates the damage caused by every single shell hit! Flooding, fire, and damage to the bridge, rudder, engines, radar and electrical systems are all part of the game. Collisions and visibility are also taken into account. You can even create your own ships and scenarios by modifying ship data and drawing new maps. By Gary Grigsby.

On April 6, 1862, General Grant found his 45,000 Union soldiers pressed against the Tennessee River at Pittsburg Landing, caught in a surprise attack by Confederate General Johnston and his Army of the Mississippi. Thus began the Battle of Shiloh, Grant's first real trial by fire. SHILOH: Grant's Trial in the West™ uses an improved version of the renowned GETTYSBURG game system and faithfully re-creates the battle in 15 turns. All historical brigades are included on the 30x30 square terrain grid, as are the Federal gunboats Lexington and Tyler. Significant refinements are the ability to switch between a strategic and tactical display anytime during play, and the inclusion of special morale rules for "green" troops. Contains Beginner, Intermediate and Advanced games. By David Landrey and Chuck Kroegel.

We've tagged every one of our
games as Advanced, Inter-
mediate, or Introductory.

■ **ADVANCED** means the game is
for those familiar with the concepts
of strategy simulation. If you're
interested in a tough or complex
game, this category is for you.

■ **INTERMEDIATE** applies to the
games that are easier to absorb,

quicker to understand. They can
serve as the perfect stepping stones
to Advanced games. However, they
are challenging and intriguing in
their own right.

■ **INTRODUCTORY** games are ones
that everyone can enjoy. They aren't
simplistic, just easy to learn and
understand. Usually, a quick glance
at the rulebook will be all that's
needed to start play.

For a complete list of our games
broken down by computer format,
please see pages 13 and 14. You'll
also find prices and ratings for
playability, realism and excite-
ment derived from our customer
response cards.
